Understanding Threats Means Understanding Information.

Security analysts and researchers are inundated with a constant and seemingly chaotic stream of news and reports. With so much content available, integrating that content and transforming it to actionable intelligence can be a daunting task. EBSCO supports this mission critical process by combining a multitude of high-quality primary and secondary sources, integrated with a comprehensive index, to create an open-source resource for identifying and understanding relevant risks and threats.

Content and Features Include:

- Nearly 3,000 full-text periodicals, peer-reviewed journals, books, monographs and reference works
- Primary source documents from government agencies, legislatures and international institutions
- In-depth Background Information Summaries on prominent people, organizations, places and events relating to homeland security and international terrorism
- Reports and analysis from leading experts and consultancies
- Government research, including the Congressional Research Service, GAO, FBI, Department of State, Homeland Security and more
- Extensive image collection of over 10,500 pertinent images
- Specialized subject index
